### **From the Principal's Desk**

After the Second World War during 1946, there was a lone college called D.M. College in Manipur. Then, two private colleges namely Imphal College and Manipur College came to establish having Day and Night shifts. Students of those days who hailed from the far flung areas of Manipur, after class-X then called Matriculate had faced to discontinue their studies joining cultivation works for livelihood or joining some service of Government available at that time. The same conditions were also with the people of Thoubal and its adjoining areas. Those students who were very eager to continue higher studies after matriculation had to stay at Imphal to admit in the three colleges. Due to increase number of High Schools, there was also rapid increase of Matriculate students in and around Thoubal during 1960s. Students who opted to continue higher studies went at night classes of Imphal College and Manipur College, hiring one bus at that time. The condition of the students who travelled by bus up and down to Imphal from Thoubal and returning to their respective homes at night after the college were over at round 10-11 O'clock were awesome. The expenditure such as college fees, bus fares and other personnel expenditure were a great burden, they could not stay at Imphal as they were basically engaged in the newly established schools, Government offices and cultivation works due to financial backwardness. Meanwhile, Imphal College and Manipur College had also converted their night-shifts into day-shifts due to completion of their own buildings.

At that crucial juncture, the then pioneer/prominent figures, leaders, educationist, volunteers, social workers of Thoubal area, joining hands together with the help of the public of Thoubal had decided to establish a college at Thoubal, covering the whole Thoubal Division of the time, now Thoubal District. It has been learnt that, for the 1<sup>st</sup> time on 11<sup>th</sup> May, 1963, three educated young (at that time) men namely Shri Ak. Birendra Singh, Shri Jatishor Luwang and I. S. Akoijam seated together at one ManishangGirls L.P School and decided to approach the then leaders of Thoubal for the establishment of one college at Thoubal. Then Shri Birendra and Konsam Gulap Singh were started detailed discussions and finally a large gathering of public meeting was held at Thoubal Bazar on 19<sup>th</sup> July, 1963. A resolution was adopted in that public meeting to establish one college immediately, in the name of Thoubal College and also adopted to start the classes for the first session at Chaoyaima High School, now Chaoyaima Higher Secondary School on the 8<sup>th</sup> August, 1963 as night-shift, opening only the Pre-University (1 year) Course with ten subjects in Arts Stream only. The founder Principal of this college was Late Shri Konsam Gulap Singh and Late Shri Ningthongbam Shamu Singh was the vice-Principal. And twelve other available teachers were engaged to teach the students free of cost. Most of

---

these respectful and precious teachers who deserved to be worshiped as Gurus are no more with us and departed for their Heavenly Abode. May their souls rest in peace.

After the college was started it was another big challenge to get hold of qualified teachers. Due to acute shortage of local post graduates at that time, advertisements were flashed in national newspapers like The Hindu, in an attempt to get qualified intellectuals from outside the state of Manipur. Consequently some came from Kerala, Assam, Bengal and others, most of them were here from 1964 to 1968. Ultimately a fervent approach was made to the then local academic stalwarts of the state, Shri I. Tompok Singh, Shri L. Lalit Singh, Shri L. Sarat Singh, Shri S. Biramani Singh, Shri Habibur Rahaman, Shri Th. Shamphaba Singh and Shri Th. Brajabidhu Singh etc. to be part of the faculty with renowned local teachers of that time. This raised the confidence of the local populace in the college and in no time the number of students increased many fold. Then Governing Body members of the College had a huge fund crunch to meet the expenses for the teachers' remuneration well as the required Reserve Fund for the University. Big donations were not available as there were not many rich people in Thoubal area those days. Hence the GB members decided to go the general public and beg for the survival of the college. They went from house and collected whatever was offered – cash or kind (paddy etc.), which amounted to only a few thousands. The GB members themselves contributed a sum of rupees hundred each. Anybody who could donate rupees one hundred was given GB membership. Shri Waikhom Mani Singh and Shri Langpoklakpam Chaoyaima Singh donated a sum of rupees five hundred each. The then Inspector of Schools, Thoubal collected rupees twenty each from the teachers under his jurisdiction, which amounted to about rupees five thousand. Thus the Reserved Fund of rupees ten thousand for the University was met. However, the fund crunch was not over yet and the survival of the college was in doubt. It came to a situation where anybody capable of donating rupees fifty thousand would be privileged to rename the college in his own name, were announced but no one responded. A couple of years went by in such extreme hardship. Then help came in some form or the other. Shri W. Mani Singh, the then Hon'ble MLA who was also the President of the GB was able to persuade the Govt. of Manipur to sanction a sum of rupees thirty eight thousand for the college. With the effort of Shri W. Nimaichand Singh, the college got a sum of rupees fifteen thousand from the Liquidated Manipur State Marketing Co-operative Society and another rupees one thousand five hundred from the then Thoubal Block Office. A valuable contribution was made by the students by parting rupees forty to fifty each from their scholarship for the college fund. Thus the fund crunch was relieved to a great extent. Then it came the dilemma of getting a proper place/ site for permanent campus of the College. Shri L. Chaoyaima Singh and Shri Ibohanbi Singh were entrusted with the task of finding a site for the college building. The site where the college stands today was offered generously by the people of Thoubal Wangmataba Sorok Mathak, for which the College will ever be offered generously by the people. The foundation stone for the current RCC building was laid by the then Chief Minister of Manipur Shri M. Koireng on the 25<sup>th</sup> April, 1966. The architectural plan for the building was drawn by late Shri Khuraijam Mani Singh, BE

(Civil) free of cost. The contribution of Shri Shoibam Thoiba of Thoubal Makha Leikai in the construction of the building as Head Mistry cannot be described in words.

As the college turns 56<sup>th</sup> years today, we offer our heartfelt gratitude to these stalwarts. The routine classes of the college were shifted to the new building on January 13<sup>th</sup>, 1969 and the Night-Shift College becomes Day-Time College. Then it came the need for opening of degree classes and with it the need for additional classrooms. On the demise of Shri Nimaichand in 1969, Shri Konsam Gulap Singh suggested to dedicate a Hall in the name of Shri Nimaichand to the College. Thus Nimaichand Memorial Hall came into being with six adequate classrooms with a generous fund from the family of late Shri Nimaichand. The Thoubal College will always remain indebted to this family. With the opening of degree classes, it was necessary to appoint a qualified Principal who fulfilled the guidelines as per the rules and regulations of the University. Shri Dwijamani Dev Sharma was approached for the same and he became the honorary Principal. Later Shri N. Shamu Singh was appointed the fulltime Principal on 12<sup>th</sup> December 1967. Since then twenty Principals have rendered their valuable services to the College, when it had been converted into full-Fledged Government College on the 16<sup>th</sup> Dec, 1967.

As Thoubal College is 56 year old, we offer our gratitude and Shardhanjali to all the pioneers of the College, for their selfless efforts in making what the College is today. Today, we have eighteen subjects are opening in Arts, Science and Vocational Courses having more than 1500 students in this academic session, 2019-20 are pursuing their higher studies. A Study Centre of Indira Gandhi National Open University (IGNOU) that is Thoubal College IGNOU Study Centre bearing Code No. 1705 is also opened in the campus of the College. A modernized Science Laboratory Block was inaugurated on the 8<sup>th</sup> August, 2016 which enhances the quality of the infrastructure available in the College. The National Assessment and Accreditation Council (NAAC) have accredited the College with B-Grade in 2015. Under UGC-NER, Guwahati one Indoor Sports Training Centre, one Swimming Pool and one Sports Fitness Centre have been constructed at this College. By RUSA, the classrooms have been repaired and renovated to modern standards and science laboratories are also renovated with modern equipment. The college has been awarded **Best College** in the North East Graduate Congress-2019 held at University of Science & Technology, Meghalaya in association with Regional Institute of Science and Technology, 9th Mile during the 15<sup>th</sup> -17<sup>th</sup> February, 2019. The college has been approved by RUSA for upgradation to Model Degree College of the District by RUSA, Ministry of Human resource Development, GOI.

So in near future, we are also expecting the college as a Modern Degree College in our District and then in future an **Autonomous College** as per New Education Policy. The college has produced the 1<sup>st</sup> Batch of B. Voc. Degree holders from Manipur University in the trades of Food Processing & Engineering and Tourism & Hospitality Management. This year also, UGC has approved to open B. Voc. in the Trade Yoga & Nature Cure. There are other facilities for co-curricular activities such as sports, three Units of NSS and NCC for boys and girls. Thus, this Day, Thoubal College celebrates 56 years of unmatched services to our community. We should reminisce and pay tribute to

---

those great people who sacrificed their valuable times, lives and much more to build this Thoubal College for what we gain now and for what to be gained in the generations to come.

It is my great privilege to present College Annual Report 2018-19, compiled and edited by the Publication Committee of the College. This publication provides manifold information on academic matters like courses studies, enrolment of students, faculty members and their research contributions in addition to student's activities, important events materialized during the last year etc. The college has been constantly pursuing a well - balanced growth pattern in all academic atmospheres. I also appeal to all my colleagues in the college with renewal dedication to usher a quality education in the college particular and in general to this region.

## **ANNUAL REPORT 2019-20, 2020-21 AT A GLANCE**

The Thoubal College is celebrating its 58<sup>th</sup> Foundation Day on Thursday, the 8<sup>th</sup> August, 2021. The college has succeeded in producing a good number of students, educationists, dutiful public servants and social workers serving in and outside the state of Manipur. This Annual Report is a snapshot of all important activities undertaken in the college through the year. It records the achievements of the students, faculty and acknowledges the support of prominent people of the region, college alumni and others.

The present Annual Report, 2019-2020 & 2020-2021 of the college consists of broad sections. In the first section, a general outlook of the college is presented with institutional background, chronicle, list of the first Governing Body members, list of first faculty members and chronological list of Principals in addition to the current lists of such kind. An important list of activities performed during the last couple of twenty four months rather than normal academic functioning is devoted in the second section under the caption of important events of the year. The third section is organized for students' profile of the year leading to office bearers of Students' Union, list of Students' Awardees; facts and figures of students with respect to admission and examination etc. In the fourth section, details of working committees of the year are incorporated. It helps to assess the institutional responsibilities in addition to normal duties for all teaching and non-teaching staffs. Under the caption of profile of faculty members, the fifth chapter has been introduced mainly dealing with various achievements/ contributions of teachers in case of research, co-curricular and extra-curricular activities performed during the period of twelve months.

We, on behalf of the Editorial Board are deeply indebted to Smt. O. Chaoba Devi, Principal, Thoubal College, Thoubal for her constant encouragement in editing the present information explored from the college records. It is also thankful to the teaching and non-teaching staffs for their support and co-operation in collecting information/ data for organizing the present Annual Report. The Editorial Board of the Annual Report is desirously working to bring the college a high quality institution in higher education in Manipur, one of the India's North East States internationally bordering with Myanmar.

### **GENERAL OUTLOOK**

#### **1.1 Introduction**

As fifty-six years of successful existence, the Thoubal College is one of the oldest Government Colleges in Manipur. Established on the 8<sup>th</sup> August 1963, the college is now a full-fledged degree college affiliated to Manipur University, Imphal. The college is approved under Section 2(f) and 12(b) of the UGC Act. and is fit to receive grants for research and developmental schemes from various funding agencies like UGC, ICSSR, DST, DBT, AERB/ CSRP and many others. The National Assessment and Accreditation Council (NAAC), Bangalore has accredited the College with B-Grade in 2015. With a long vision for imparting higher education to the progressive youths of the then Thoubal Division (now Thoubal District), the college was established as a Night-College attached to the building of Chaoyaima High School, Thoubal (at present Chaoyaima Higher Secondary School) with the generous donations from most of the households of Thoubal area under the leadership of some local educationists. In fact, it was a result of the efforts of the educated pioneers with inspiration and support from the local public. Its own building (old building) at the present campus was constructed in the year 1969 and the college was shifted and converted into a Day-College from the academic session 1969-70.

The college has now 16 (sixteen) permanent departments pursuing both general and honours courses. They are Physics, Chemistry, Mathematics, Statistics, Botany, Zoology, Geology, Computer Science, Environmental Science, Geography, English, Economics, Political Science, Education, History and Manipuri, Philosophy. It has also 3 (three) UGC newly launched departments having Bachelor of Vocational (B.VoC) Courses on (i) Tourism & Hospitality Management' (ii) Food Processing & Engineering (iii) Yoga & Nature Cure. In this College, the Diploma Course in Food Preservation and Technology is also opened in last 4<sup>th</sup> July, 2017 as a holistic scheme of Rashtriya Uchchatar Shiksha Abhiyan (RUSA) under Ministry of Human Resource Development. Besides, the college has one Study Centre of Indira Gandhi National Open University (IGNOU) in its campus providing the facilities of Bachelor Degree Programme, Bachelor Preparatory Programme, and Master Degree Programmes in Public Administration, Political Science and English. In this IGNOU Study Centre, more than 500 students were enrolled in the year 2016. The college has a big campus of around 17 (seventeen) acre of land and is picturesque with beautiful hilly slopes nearby. The college is located at the district headquarter of Thoubal about 20 km from Imphal, the capital city of the state along the National Highway (NH) No. 102 towards Moreh, the border town of the State bordering Myanmar (Burma). Imphal is well connected by Air with metropolitan cities of the country by daily flights. It is also connected by the Luxury Deluxe Buses from Guwahaty and Silcher (Assam) by the NH No. 37 and from Dimapur (Nagaland) by NH No. 102. Hostel facilities for both boys and girls are also available in the campus itself. The college is vibrant with the activities and is entering a phase of transformation and growth. The physical and academic infrastructure is growing on the way to reaching one of the best benchmarks in Manipur. The digital links

of the college may be materialized through the Website: [www.tbhc.ac.in](http://www.tbhc.ac.in) and Email: [thoubalcollege@yahoo.com](mailto:thoubalcollege@yahoo.com).

## **SECTION - VI APPENDIX**

**Green Audit Report for the year 2019-2020; 2020-2021**

### **GREEN AUDIT OF THOUBAL COLLEGE, THOUBAL (MANIPUR) CHAPTER I**

#### **INTRODUCTION**

**“Someone’s sitting in the  
Shade today because  
Someone planted a tree  
A long time ago.”**

---

**-Warren Buffet**

**(American Business tycoon)**

Environmental auditing originated in the United States in the 1970s as a way of checking whether a company was complying with the multitude of new environmental laws and regulations. The United States Environmental Protection Agency (EPA) defined environmental audit as “*a systematic, documented, periodic, and objective review by regulated entities of facility operations and practices related to meeting environmental requirements*” (EPA, 2003 cited in Anthony *et al.*, 2003, p.36).

The Green auditing is a means of assessing environmental performance (Welford, 2002). It is a systematic, documented, periodic, and objective review by regulated entities of facility operations and practices related to meeting environmental requirements (EPA, 2003). It is otherwise the systematic examination of the interactions between any operation and its surroundings. This includes all emissions to air; land and water; legal constraints; the effects on the neighbouring community; landscape and ecology; the public’s perception of the operating company in the local area. Green audit does not stop all compliance with legislation. Nor is it a ‘green washing’ public relations exercise. Rather it is a total strategic approach to the organisation’s activities (CBI, 1990).

The rapid urbanization and economic development at local, regional and global level has led to several environmental and ecological crises. On this background it becomes essential to adopt the system of the Green Campus for the institute which will lead for sustainable development. Thoubal College, Thoubal (Manipur) is deeply concerned and unconditional believes that there is an urgent need to address these fundamental problems and reverse the trends. Being a premier institution of higher learning, the College has initiated ‘The Green Campus’ program two years back that actively promote the various projects for the environment protection and sustainability.

INDIA is the first country in the world to make environmental audits compulsory. The government of India, by its gazette notification [No. GSR 329 (E)] of March 13, 1992, made it mandatory for all industries to provide annual environmental audit reports of their

---

operations, beginning with 1992-93. Under this, industries are required to provide details of water, raw materials and energy resources used, and the products and wastes generated by them. These audit reports were to be submitted to the concerned State Pollution Control Boards or before September 30 every year.

Green Audit is the most efficient & ecological way to solve such a environmental problem. For protecting the nature we have to show our sense of humour towards the mother earth. In corporate sector the practice of saving environment through the various programmes like CSR (Corporate Social Responsibility), Go Green, Save Water, Save Trees, Plantation of trees are to be taken. It will definitely work for the future. (Bețianu, 2008). That is the only way out to safeguard the planet. The Green Audit of is Requirement of NACC Committee to the Colleges of the country. It is necessary to conduct a green audit in college campus to make students aware of the green audit, its advantages in saving the planet.

---

### **Need for Green Audit:**

There is a provision of green audit in college campus. A committee has been formed to monitor the proper conservation and plantation of the plants in the campus. As per the suggestions made by IQAC, the Department of Botany is given the responsibility to do green audit with active cooperation from other departments. Accordingly a report on green audit has been prepared by department of Botany Thoubal College, Thoubal. This college was established in 1963 and accredited with Grade 'B' by NAAC, Bengaluru. Total area of the college main campus is 15 acres, of which 20 percent is covered by herbs, shrubs and trees, including valuable medicinal plants. The plants have been systematically identified by the green audit committee. More than 431 plant species were audited. Extra efforts have been taken by the college to create environment consciousness amongst students. One major step in this regard is the extensive plantation program organized by NSS, NCC, garden committee and teachers and students of the college. Plantation is encouraged by principal and faculties of all departments to increase greenery and reduce carbon emission effects. The existing botanical garden is maintained by the garden committee of this college. Extension programs also organized to create environment awareness and conservation of biodiversity amongst the students and public.

### **Acknowledgement**

The audit team would like to thank our Principal, Smt. O. Chaoba Devi for her consent to conduct this audit. We would like to sincerely thank all the faculty members of all Departments, students and non-teaching staff for their kind cooperation with us during this survey. We would also like to specially thank the Laboratory Assistants of all the science Departments who helped us a lot in furnishing useful information.

## CHAPTER II Objectives of Green Audit

1. Verifying compliance: Verifying compliance with standards or best available techniques.
2. Identifying problems: Detecting any leakage, spills or other such problems with the operations and processes.
3. Formulating environmental policy: Formulating the organisation's environmental policy if there is no existing policy.
4. Measuring environmental impact: Measuring the environmental impact of each and every process and operation on the air, water, soil, worker health and safety and society at large.
5. Measuring performance: Measuring the environmental performance of an organisation against best practices.
7. Confirming environmental management system effectiveness: Giving an indication of the effectiveness of the system and suggestions for improvement.
8. Providing a database: Providing a database for corrective action and future plans.
9. Developing the organization's environmental strategy: Enabling management to develop its environmental strategy for moving towards a greener corporate and performance culture.
10. Communication: Communicating its environmental performance to its stakeholders though reporting will enhance the image of the company.

**Procedure of Environmental Audit:** There are a number of different environmental auditing procedures advocated in the auditing literature. A model of the audit procedure which is universally accepted was first developed by Arthur D Little. This was later adopted by the International Chamber of Commerce (ICC) in 1989. Based on this approach, Humphrey and Hadley (2000) divided the environmental auditing process into three main areas of activity i.e., (i) Pre Audit Activities, (ii) On Site Activities and (iii) Post Audit Activities. Each of these phases comprises a number of clearly defined objectives, with each objective to be achieved through specific actions. These actions produce results in the form of outputs at the end of each phase.

**(i) Pre-audit activities:** Once a commitment to auditing has been made, a number of activities need to be completed before the on-site activities commence. This is being done to reduce the amount of time spent in on-site activities which is expensive for both the auditee and audit team. The pre-audit activities usually include the following:

- The auditee should be informed of the date of the audit as soon as possible, enabling them to adjust and become used to the concept.

- 
- The audit scope should be identified. The auditee should usually be consulted when establishing the scope.
  - The audit plan should be designed in such a way that it can accommodate changes based on information gathered during the audit and effective use of resources. Audit team and assignment of responsibility should be established.
  - The background information on the facility including the facility's organisation, layout and processes and the relevant regulations and standards, should be collected.
  - The background information on the site's historical uses, and the location of soil and groundwater contamination should be collected.
  - The pre-audit questionnaire should be sent to auditee (Humphrey and Hadley, (2000)).

**(ii) On-site audit activities:** The on-site audit is the most important step of the audit procedure. This includes:

- The opening meeting is the first step between the audit team and auditee. In this meeting the purpose of audit, the procedure and the time schedule are discussed.
- Site inspection is the second step for on-site activity. In this step the audit team may discover matters which are important to the audit but which are not identified at the planning stage.
- The on-site phase requires the audit team to develop a working understanding of how the facility manages the activities that influence the environment and how any EMS, if there is one, works.
- Assessing strengths and weaknesses of the auditee's management controls and risks associated with their failure need to be established.
- Gathering audit evidence involves collecting data and information using audit protocol.
- Communicating with the staff of the auditee to obtain most information.
- Evaluating the audit evidence against the objectives established for the audit and an agreed protocol.
- An exit meeting takes place once all of audit findings have been finalized with facility personnel (Humphrey and Hadley, 2000).

**(iii) Post-audit activities:** Post-audit activities begin with the preparation of a draft report. The draft report should be reviewed by the facility personnel directly involved in the audit. The final report should be derived from it and it should then be distributed to all interested parties within the organisation. Humphrey and Hadley (2000) confirm that it is important for management to follow-up the report and develop an action plan to implement

---

those audit findings. The ICC (1991) (cited in Humphrey and Hadley, 2000) identifies five elements of a successful follow-up programme. These include:

- A standard action plan format;
- Established procedures for approving the action plan and communicating its contents;
- Regular reporting of the action plan's status;
- Special reporting and chasing up of overdue action and
- Independent auditing of the action plan to verify that all actions sanctioned have been completed.

The formal audit procedure is completed as soon as the action plan has been completed.

**General steps followed:**

1. Systematic and comprehensive data collection
2. Documentation with physical evidences
3. Independent periodic evaluation with regulatory requirements and appropriate standards
4. Systematic and comprehensive improvement and management of existing system

**Target Areas of Green Auditing:**

Green audit forms part of a resource management process. Although they are individual events, the real value of green audits is the fact that they are carried out, at defined intervals, and their results can illustrate improvement or change over time. Eco-campus concept mainly focuses on the efficient use of energy and water; Minimize waste generation or pollution and also economic efficiency. All these indicators are assessed in process of "Green Auditing of educational institute". Eco-campus focuses on the reduction of contribution to emissions, procure a cost effective and secure supply of energy, encourage and enhance energy use conservation, promotes personal action, reduce the institute's energy and water consumption, reduce wastes to landfill, and integrate environmental considerations into all contracts and services considered to have significant environmental impacts. Target areas included in this green auditing are water, energy, waste, green campus and carbon footprint.

---

## **Methodology of Green Auditing**

The purpose of the audit was to ensure that the practices followed in the campus are in accordance with the Green Policy adopted by the institution. The criteria, methods and recommendations used in the audit were based on the identified risks. The methodology includes: preparation and filling up of questionnaire, physical inspection of the campus, observation and review of the document, interviewing responsible persons and data analysis, measurements and recommendations. The methodology adopted for this audit was a three step process comprising of:

1. Data Collection – In preliminary data collection phase, exhaustive data collection was performed using different tools such as observation, survey communicating with responsible persons and measurements. Following steps were taken for data collection:

The team went to each department, centres, Library, canteen etc.

Data about the general information was collected by observation and interview.

The power consumption of appliances was recorded by taking an average value in some cases.

2. Data Analysis - Detailed analysis of data collected include: calculation of energy consumption, analysis of latest electricity bill of the campus, understanding the tariff plan provided by the Manipur State Power Corporation Limited (MSPCL). Data related to water usages were also analysed using appropriate methodology.

3. Recommendation – On the basis of results of data analysis and observations, some steps for reducing power and water consumption were recommended. Proper treatments for waste were also suggested. Use of fossil fuels has to be reduced for the sake of community health. The above target areas particular to the college was evaluated through questionnaire circulated among the students for data collection.

## CHAPTER III Post Audit

### Stage

The base of any green audit is that its findings are supported by documents and verifiable information. The audit process seeks, on a sampled basis, to track past actions, activities, events, and procedures to ensure that they are carried out according to systems requirements and in the correct manner. Green audits form a part of a process. Although they are individual events, the real value of green audits is the fact that they are carried out, at defined intervals, and their results can illustrate improvement or change over time. Although green audits are carried out using policies, procedures, documented systems and objectives as a test, there is always an element of subjectivity in an audit. The essence of any green audit is to find out how well the environmental organisation, environmental management and environmental equipment are performing. Each of the three components are crucial in ensuring that the organisation's environmental performance meets the goals set in its green policy. The individual functioning and the success of integration will all play a role in the degree of success or failure of the organisation's environmental performance.

### Geographical Background of Thoubal College

Thoubal College Campus is located in an area locally known as "Thoubal Lamdong" meaning an elevated area from the surrounding land. Physically, its location is of considerable significance as it has on an elevated trough in the middle of the Thoubal Khunou hill trench in the north and Thoubal valley. It has an elevation of 784 meters (2572 ft) from the MSL and lies at the coordinates point of 24<sup>0</sup> 65' 50" E of Greenwich and 93<sup>0</sup> 99' 80" N longitude, The College Campus covers an area of about 15 acres (6.07 hectare).

Areas covered under this Green audit are as follows:

- Determination of Land use pattern of the College
- Determination of Green Area of the College Campus and study of the Flora of the College campus
- Study of the Fauna of the College campus.

### Land use pattern of the College

The land-use pattern of the college is mainly of:

- A. Build-up area (area occupied by buildings)
- B. Area occupied by water tank, reservoir, swimming pool, etc.
- C. Area under tree plantation
- D. Agricultural Land
- E. Play ground

### 1. Build-up area of the College:

A. Build-up area (Area occupied by buildings)	Length (in ft.)	Breadth (in ft.)	Total area (in ft <sup>2</sup> )

### **Observations**

Total area of the College = 15 acres

- A. Total Build-up area = 2.11 acres
- B. Total water (reservoir and tanks) = 0.64 acres
- C. Total tree plantation area = 2.67 acres
- D. Agricultural area = 2.64 acres
- E. Play ground area = 4.87 acres
- D. Fallow land area = 0.034 acres

Actual total area of the College: 13.27 acres (5, 77937.98 ft<sup>2</sup>)

- ☐ Loss 1.73 acres because of encroachment by the surrounding farmers.

### **Recommendations**

It is proposed to have a proper fencing to stop further encroachment on college campus.

## CHAPTER IV

### Auditing for Green Campus Management

Unfortunately, biodiversity is facing serious threats from habitat loss, pollution, over consumption and invasive species. Species are disappearing at an alarming rate and each loss affects nature's delicate balance and our quality of life. Without this variability in the living world, ecological systems and functions would break down, with detrimental consequences for all forms of life, including human beings. Newly planted and existing trees decrease the amount of carbon dioxide in the atmosphere. Trees play an important ecological role within the urban environment, as well as support improved public health and provide aesthetic benefits to cities. In one year, a single mature tree will absorb up to 48 pounds of carbon dioxide from the atmosphere, and release it as oxygen. The amount of oxygen that a single tree produces is enough to provide one day's supply of oxygen for people. So while you are busy studying and working on earning those good grades, all the trees on campus are also working hard to make the air cleaner for us. Trees on our campus impact our mental health as well; studies have shown that trees greatly reduce stress, which a huge deal is considering many students under some amount of stress.

**Green Area of the College Campus and study of the Flora of the College campus** This includes the plants, greenery and sustainability of the campus to ensure that the buildings conform to green standards. This also helps in ensuring that the Environmental Policy is enacted, enforced and reviewed using various environmental awareness programmes.

The flora of Thoubal College Campus has been listed and counted at regular intervals using standard methods as described by Raunkiaer (1934), Cain (1950), Curtis & McIntosh (1950), Curtis & Cottam (1956), Puri (1960), Misra (1968) and Mueller-Dombois & Ellenberg (1974). Various tree plantation programs are being organized during World Environment Day (5<sup>th</sup> June) and Van Mahotsava (1<sup>st</sup> week of July) at college campus. This program helps in encouraging eco-friendly environment which provides pure oxygen within the institute and awareness among villagers. The plantation program includes the plantation of various types of both indigenous and exotic species of trees and shrubs. One Botanical Garden covering an area of 13,312.60 sq.ft. have been established in the year 2013. Many important species of trees, shrubs and herbs (both indigenous and exotic) are being conserved in this Botanical Garden.

## Observations

**Trees, palms and bamboos:** Altogether 80 tree species belonging to 65 genera that are distributed over 35 families could be listed during the present investigation. Besides the trees nine species of palms and one bamboo species could also be listed. Efforts have been made to give scientific names to all the tree species. Some of the tree species are of great medicinal values whereas some are fruit bearing.

**Herbs, Shrubs and Climbers:** Altogether 52 plant species belonging to 49 genera that are distributed over 29 families could be listed during the present investigation. Many of the plant species in this group are also of significant medicinal values.

**Grassland Flora:** In the patches of grasslands like the playground, fallow lands, inside the botanical garden and agricultural lands, a total of 81 plant species belonging to 73 genera that are distributed over 32 families could be listed and counted during the present investigation. Many of the plant species have significant medicinal values.

### **Recommendations:**

- ☐ More trees should be planted in the campus as only 2.67 acres are under tree cover which is hardly 20% of the total geographical area of the College. As a national norm, 33% of the total geographical area should be under tree cover.
- ☐ Listing of fern flora and of aquatic plants should be taken up at the earliest.
- ☐ A separate orchidarium exclusively for the endemic orchids of the state could also be developed. At present the Botanical Garden houses only one orchid species.
- ☐ Reviews periodically the list of trees planted in the garden, allot numbers to the trees and keep records. Give scientific names, common English names and local names to the newly planted species of trees.
- ☐ A separate herbal medicinal plants garden could be developed in the campus as the State of Manipur is included under Indo-Burma Hot Spot of Biodiversity (one of the 34 Hot Spots of Biodiversity of the world).
- ☐ Promote environmental awareness as a part of course work in various curricular areas, encourage independent research projects, and community service.
- ☐ Create awareness on environmental sustainability, importance of trees, conservation of medicinal plants and takes actions to ensure environmental sustainability.
- ☐ Establish a College Environmental Committee that will hold responsibility for the enactment, enforcement and review of the Environmental Policy. The Environmental Committee shall be the source of advice and guidance to staff and students on how to implement this Policy.
- ☐ Ensure that an audit is conducted annually and action is taken on the basis of audit report, recommendation and findings.
- ☐ Celebrate every year 5th June as 'World Environment Day', first week of July as Van

---

Mahotsava with tree plantation programs on this day to make the campus more Green.

- The organization may take initiative for community plantation programme by involving students to offset the GHG emission. Celebrate every year 16<sup>th</sup> September as “International Day for the Preservation of Ozone Layer”.
- Green habitat concept should be adopted for all the building construction activities of the College in future, which may help a long way in reducing energy usage, increasing aesthetic appeal of the buildings and class rooms, besides reducing carbon foot print and shades for the benefit of the students.

100	<i>Rattus norvegicus</i>	Brown rat	Uchi
101	<i>Rattus rattus</i>	Common Indian black rat	Bora uchi
102	<i>Rhinolophus luctus</i>	Horse shoe bat	Shekpi

**Recommendations:**

- More fruit bearing trees should be planted in the campus to encourage nesting by the visiting avi-fauna.
- An aquarium with local ornamental fishes could be installed at the Zoology Department.

## CHAPTER VI

### Auditing for Energy Management

Energy cannot be seen, but we know it is there because we can see its effects in the forms of heat, light and power. This indicator addresses energy consumption, energy sources, energy monitoring, lighting, appliances, and vehicles. Energy use is clearly an important aspect of campus sustainability and thus requires no explanation for its inclusion in the assessment. An old incandescent bulb uses approximately 60W to 100W while an energy efficient light emitting diode (LED) uses only less than 10 W. Energy auditing deals with the conservation and methods to reduce its consumption related to environmental degradation. It is therefore essential that any environmentally responsible institution examine its energy use practices. Electricity Consumption in the College Campus.

Electricity Consumption per Year in the College campus has been estimated to be around 1301 kWh. Average Electrical Consumption per Month and per day was estimated to be 108.4 kWh and 4.33 kWh respectively. Plenty of ICL (incandescent lamp) bulbs are still in use in the campus which consumes more amount of electricity at the same time releases more amount of CO<sub>2</sub> when compared to CFL and LED bulbs. On an average a 100W ICL bulb when used for 3.5 hours daily will consume 127.75kWh of electricity releasing 104.76 kg of CO<sub>2</sub> annually. In comparison, a 20W CFL (Compact Fluorescent Lamp) when used for 3.5 hours daily will consume only 25.55kWh of electricity while releasing only 20.95 kg of CO<sub>2</sub> annually. The power consumption patterns when calculated @ Rs 4/- per kWh will amount to Rs 511.0 for an ICL bulb whereas it is only Rs 102.20 for a CFL bulb. Power consumption can be further lowered when we use the LED bulbs in the campus. A 10W LED light bulb when used for 3.5 hours daily will consume 12.77kWh of electricity releasing only 10.47 kg of CO<sub>2</sub> annually with an expenditure of Rs 51.11.

Similarly a CRT monitor of 155W when used for 8 hours daily will consume 310kWh of electricity annually thereby releasing 254.2kg of CO<sub>2</sub> into the atmosphere. Whereas a LCD screen of 30W when used for the same number of hours daily will consume only 60kWh of electricity annually and releasing only 49.2kg of CO<sub>2</sub> into the atmosphere annually. The running cost of a CRT monitor is Rs 1240.00 per annum while that of LCD monitor is only 240.00. So, when we replace a single CRT monitor of a desktop computer by a LCD monitor, we can reduce the annual power consumption by 250kWh at the same time reducing the release of CO<sub>2</sub> by 205kg. In terms of monetary benefits, we can save an amount of Rs 1000.00 for every CRT monitor being replaced by LCD monitors.

### **Main areas for improvement**

The institution is having two DG set. The DG set exhaust is not found to be channelized through stack of stipulated height as per requirement with The Air prevention and control of pollution Rules 1982. The emission level monitoring from the stack needs to be done to check compliance to national emission standard.

The existing DG sets is not equipped with acoustic enclosure as per requirement of the Environmental Protection rules 1986. The standby DG set is the source of both noise pollution & air pollution due to inadequate acoustics & improper exhaust system. DG is located just by the side of boundary wall enabling subsequent effect in surrounding outside area.

There is no noise monitoring data available to check the compliance with the ambient noise norms as per noise pollution (Regulation and control) rules 2000.

---

In DG room fuel storage is without any secondary containment, any spillage will go to ground & the storm water drain just outside the DG room.

### **Energy Conservation & Efforts on Carbon Neutrality**

Floor wise master list connected electrical equipment with type and energy rating (e.g. – lights, fans, air conditioner, photocopier etc.) is not available for assessment of electrical load.

Single line diagram could not be evidenced to assess connected load against approved amount by CESC & floor wise load distribution. This will enable floor wise monitoring of load.

The institution may assess the equipment rating to have the baseline data for assessing energy consumption pattern.

Maximum number of electrical fans are found to be of older generation and no star ratings therefore non energy efficient. The institution may develop a phase out plan of the same by replacing with new energy efficient fans.

High energy consuming Incandescent lights and fluorescent lights are found in use. The institution may plan for long term phase out plan of the same with less energy consuming LED or CFL lights.

The institution needs to evaluate power usage efficiency by suitable measurement & monitoring of (a) total connected load segregated in lighting, AC's, fans and other utilities (b) developing operational controls to switch off lights, fans and AC's when rooms / classrooms are unoccupied. Many unoccupied classrooms are found to have fans and bulbs operational. Automation / time control mechanism may be explored.

### **Action Taken**

Both the DG sets of the college campus obtained NOC from the concerned authority. Other machines in use within the campus have least impact to air environment.

---

The college management is concerned for power saving. The practice of closing down instruments, fan, bulbs, computers, printers etc. is in practice among all the teachers and students. Conversion process of all the bulbs into LED is undergoing with a motto to save energy. The college is processing to install solar panels in the college campus in near future. The college has a health care centre with timely basic health inspection by government health practitioner. Fire-fighting arrangement has been installed in the college to counter adverse situation.

The organization may account the carbon foot print from per capita energy consumption and other means of GHG emission. Based the baseline data the organization may set target and programmed to reduce carbon foot print.
